Re: Steelcote Manufacturing Company

Dear David:

As we discussed by telephone today, this will confirm that, at this time, Steelcote plans to ship the drums of solid and semi-solid material that were stored in the tin shed offsite for disposal. This is currently scheduled to take place on Tuesday, April 30, 1991. The load will consist of approximately 46 drums.

Steelcote will provide to you a copy of the manifest and land disposal restriction notice that accompanies the manifest.

During the telephone conversation this morning among Cynthia Hutchinson, you, and me, Ms. Hutchinson mentioned that EPA wanted copies of the test results from the TSD facility before the materials are shipped off for disposal. At the time we spoke, I was not aware that Steelcote had made arrangements to dispose of the drums of solid and semi-solid material. Thus, I did not anticipate the short period of time between our telephone conversation and the disposal date. In our later telephone conversation, we agreed that Steelcote could proceed with the disposal of these drums on April 30 without having to provide the TSD test results prior to shipment. You stated you were going to discuss this again with Ms. Hutchinson and would get back to me if your position changed.

I will contact you concerning the handling of the drums filled with mostly liquid when I have more information. In the meantime, please call me if you have any questions.

Very truly yours,
